Unibanco and Unibanco Holdings

CONSOLIDATED RESULTS FOR THE YEAR 2001

(São Paulo, Brazil, February 21, 2002) — Unibanco - União de Bancos Brasileiros S.A. and Unibanco Holdings S.A released today their consolidated financial results under Brazilian GAAP for the Year 2001.

Highlights for the period

- Net income for the year 2001 reached R\$ 972 million, exceeding the year 2000 figure in 31.5%. Annualized ROAE and ROAA were of 16.8% and 1.8%, respectively.
- Net income in the fourth quarter reached R\$ 241 million, representing an increase of 31.7% over 4Q00. The annualized ROAE was 16.8% whereas the annualized ROAA stood at 1.7%. This result includes an unfavorable R\$ 137 million impact in 4Q01, resulting from investments abroad net of hedges.
- Earnings per 1000 shares reached R\$ 1.72 in 4Q01 and R\$ 6.95 in 2001, the latter being 15.4% above the 2000 earnings of R\$ 6.02 per 1000 shares, even after considering a 14.3% share increase that took place on December 28, 2000, due to the acquisition of Banco Bandeirantes.
- The stockholders' equity reached R\$ 6.1 billion in December, 2001. The book value per 1000 shares stood at R\$ 43.82.
- In January 2002 Unibanco paid dividends in the amount of R\$ 171.0 million, added to the R\$ 152.2 million paid in advance in July, 2001, totaled R\$ 323.2 million distributed in the social exercise of 2001, up 22.5% over the previous exercise.
- As of December 31, 2001, within the buy-back program, 1,948,700,000 shares were repurchased - PNs, Units and GDSs, at an average price of R\$ 37.10, totaling expenses of R\$ 82.6 million. The total market value of the treasury stocks repurchased as per the Unit price at BOVESPA on December 28, 2001, was of R\$ 98.4 million, being R\$ 116.0 million the total value of the treasury stocks at year-end 2001.
- Total Unibanco assets reached R\$ 55.6 billion, representing an increase of 8.0% in 2001. From this total, R\$ 25.4 billion consisted of loans, R\$ 15.5 billion were marketable securities, consisting mainly of federal securities, and R\$ 4.7 billion were interbank and open market.
- The credit portfolio, in the amount of R\$ 25.4 billion, grew by 2.1% and 17.3% over September, 2001 and December 2000, respectively.
- At the end of December 2001, consolidated allowance for lending, leasing and other credits losses, pursuant to the Central Bank of Brazil Resolution 2682, totaled R\$ 1,538 million, down 1.7% Q-o-Q and representing 6.0% of total credit risk. These provisions were:
 - R\$ 651 million or 42.3% of the total, established to cover overdue credits, bankruptcies and insolvencies;
 - R\$ 716 million or 46.6% of the total, for the risk on credit transactions, under Resolution 2682 and credits to mature; and
 - R\$ 171 million in addition to the minimum required provision, based on a more conservative percentage than that required by the Central Bank. This latter being R\$ 32 million higher than 3Q01.
- Unibanco's overall funding reached R\$ 63.7 billion by December 31, 2001, down 1.1% and up 5.5% over the last three and twelve months, respectively. Total funding includes R\$ 20.4 billion in assets under management. Local funding rose 2.3% over the last three months to R\$ 32.5 billion,

mainly due to the growth in savings, time deposits and funds for BNDES onlendings.

- Funds and portfolios under UAM's management were up 2.7% Q-o-Q, from R\$ 19.9 billion at the end of September 2001 to R\$ 20.4 billion at the end of December 2001, being stable when compared to December 2000.
- The Basle capital adequacy ratio, in accordance with Central Bank guidelines, stood at 13.7% in December 2001, against 13.3% in September 2001 and 16.5% in December 2000. The ratio decline over the year resulted from the increase in the loan and securities portfolio and the change in regulations on foreign exchange exposure. This ratio remained substantially above the Central Bank's minimum requirement of 11%.
- Financial intermediation revenues in 2001, of R\$ 10.2 billion, rose by 51.5% over the year, mainly due to the credit portfolio growth, the consolidation of Banco Bandeirantes and the additional 50% from Banco Fininvest – both occurred in December, 2000, as well as the organic growth of the businesses.
- Financial intermediation revenues before allowances for lending, of R\$ 5.386 million, were up 38.7% Y-0-Y and 11.5% in comparison to the previous quarter. The annualized net financial margin of the 4Q01 stood at 12.1%, above the 10.7% margin posted in 3Q01. The increase of both in the quarter occurred as a result of the portfolio growth surpassing the unfavorable effects of the foreign exchange in the period as well as proper risk management.
- Fee income for 2001 totaled R\$ 2,185 million representing a 33.2% increase when compared to the previous year. Credit card fees, totaling R\$ 864 million, grew by 39.6% and banking tariffs by R\$ 1.1 billion, posted an increase of R\$ 33.8% in the year. In the quarter, revenues totaled R\$ 588 million posting a 5.0% increase in the quarter and 25.1% Y-o-Y.
- In 2001, the consolidated personnel and administrative expenses added to R\$ 3,963 million, up 32.0% from the previous year, due to the acquisitions of Banco Bandeirantes and 50% of Fininvest, the collective bargaining agreement and organic growth. In the fourth quarter, expenses totaled R\$ 1,010 million, declining R\$ 61 million (5.7%) when compared to the previous quarter. As a consequence, the service fees revenue over the personnel and administrative expenses showed an improvement of 52.3 in 3Q01 to 58.2%

in 4Q01.

- The 4Q01 efficiency ratio of 58.0%, showed improvement when compared to the 60% ratio posted in 2000. Over the quarter, it remained stable, despite of the *real* appreciation.

Operational Highlights

Banco Bandeirantes Migration

- In October 2001, Unibanco completed the integration of Banco Bandeirantes: 463 points of sale, between branches and corporate-site branches, and were integrated. And 60 were merged into existing ones. The transition took place smoothly. Less than 650 occurrences took place across all the Banco Bandeirantes points of sale and less than 20% of them had a noticeable impact on customers. The satisfaction of the new customers was ensured, as proven by the high level of maintenance of accounts of 95.6%. The financial results of the integration process were better than expected. It was initially estimated that the Bandeirantes cost structure would decrease

by 35%, whereas the actual annualized savings, by the end of the year, reached 42%.

Retail Bank

- In 2001, 852,000 new bank accounts were opened. Added to current customers, savings account clients and pensioners, the Bank had 5.2 million customers at the end of December 2001. By also adding Fininvest's, Investcred's and Credit Luiza, the Unibanco group totaled 13.1 million customers, a 70% rise over December 2000, net of the 2.9 million non-bank account holders that are clients of Cartão Unibanco and our insurance companies.

Note: Includes savings and retirees. In Dec/01 Bandeirantes fully migrated.

- At the end of the period, Unibanco had 1,485 points of sale including 809 branches, 497 corporate-site branches or PABS, 77 in-store branches and 102 Fininvest stores.
- Investcred Unibanco – the joint-venture company in association with Globex-Ponto Frio, formed in August, has the purpose of providing credit and a line of services and products to the retail chain's customers. In September, through its affiliate Banco Fininvest, Unibanco entered into an association with Magazine Luiza, a department store chain with strong presence in the states of São Paulo, Paraná and of Minas Gerais. The new company, Credi Luiza, will finance the retail chain's customers. Both chains are strongly complementary. Together, they account for 461 points of distribution to which Unibanco acquired access. Through these partnerships, Unibanco gained greater participation in direct consumer credit among the C and D lower income classes, the segment of Brazil's population with the greatest potential for growth in terms of financial products.
- The Retail Bank loan portfolio, including Fininvest, Cartão Unibanco, 33% of Credicard, Banco Dibens, Investcred Unibanco e Credit Luiza, reached R\$ 11.0 billion in December, up 17.4% Y-o-Y. This expansion was pushed by the organic growth and by the above mentioned associations, as well as improvements to our credit scoring tools and the conclusion of the implementation of the our Database Marketing Project.
- Banco1.net, the market leader of the virtual banking segment in Latin America, and Investshop, Brazil's greatest financial portal, merged their operations by means of a stock swap. Banco1.net took over control of Investshop, which, in turn, has a 15% stake in the new institution. The merger of the two pioneering Internet banking and financial services will not do away with either of the

brands. Banco1.net account holders will gain faster, more convenient access to Investshop investments, which in turn will provide its customers with the possibility of relying on the convenience of banco1.net. The two portals will continue to be separate, but will act together regarding synergy gains, investments and revenues.

- At the end of the year, Ford Credit Brazil and Unibanco-Rodobens established a joint venture for the sale of consortium quotas - a system for financing consumer goods that combines a lay-away plan with monthly draws of the financed merchandise - at Unibanco's branches and National Ford Dealerships. As a result, Unibanco Rodobens adds to its customer base more than 40,000 members from National Ford Consortium, and became 4th largest company in Brazil in this market segment.
- The credit card business Credibanco (Cartão Unibanco) net income in 2001, of R\$ 71 million, was up 47.9% in the year. The company's total volume, measured by cardholder purchases and cash advances, reached R\$ 4.2 billion against R\$ 3.3 billion in 2000, a 27.3% increase. Total outstandings reached R\$ 308 million, 42.7% above the R\$ 216 million posted in 2000. The total number of cards issued reached 3.5 million in 2001 against 2.5 million in 2000, representing a 40% growth and raising the company's market share from 9% to 10%.
- Fininvest provided equity in results amounting to R\$ 50.2 million in 2001 with growth of 108.3% vis-à-vis the previous year. ROAE was 27.7%. In 2001, Fininvest continued to implement its network expansion plan. The objective is to reach low-income segments (C and D) on a broad scale having opened 38 new stores throughout Brazil during the year. The company ended the period with R\$ 1.6 billion in loans, R\$ 2.2 billion in assets, approximately 3.9 million of active clients and 102 stores in the main cities of Brazil.

- The Wholesale Bank consolidated its absolute leadership in onlendings of funds from the BNDES (National Bank for Economic and Social

Development), with R\$ 1.8 billion having been disbursed. The bank is also a leader in structuring and distribution of fixed income securities, having reached a business volume of R\$ 3.1 billion during the year. Moreover, it firmly established its position as the biggest Brazilian bank in the area of mergers and acquisitions with a market share of 5.5%. The bank holds also a leading position in Vendor and Compror operations, ending the year with a 14.5% market share and a volume of transactions amounting to R\$ 1.0 billion, up 15.0% over 2000.

- In the Cash Management segment, Unibanco increased its revenues by 11%, reaching some R\$ 290.0 million. The ongoing investment in technology enabled Unibanco to increase the number of users of its cash management services by 38% in 2001, to 51.3 thousand. The volume of collections, accounts payable and payrolls rose by 16.6%, to 108 million transactions.
- In the Private Banking area, Unibanco reached R\$ 7.24 billion in funds under management, a figure that kept it among the largest Brazilian banks in this segment. Among the main initiatives of the fiscal year, the following ones stand out: the inclusion of Family Succession and Protection as added services; the expansion of the Investcenter portfolio; and the consolidation of the partnership with Unibanco Asset Management, creating the Private Personal Fund.

Insurance, Capitalization Plans and Private Pension Plans

- The Insurance, Capitalization Plans and Pension Plans businesses posted consolidated gross revenues of R\$ 2.2 billion in 2001, up 23.8% over the same period last year. The companies' net income totaled R\$ 216 million in 2001. Technical reserves under management reached R\$ 2.3 billion at the end of the period, with an 11.5% growth vs. the previous year.
- The consolidated combined ratio, at 99.6%, improved 150b.p. vs. the previous year and well below the estimated market average of 103%. On the basis of this criterion, the company ranks second in the market. According to research carried out by USP (the University of São Paulo) during the first half of the year, Unibanco AIG Seguros ranked 2nd in terms of quality of services and market positioning and 1st in terms of institutional image.

- Unibanco AIG Previdência posted a net income of R\$ 23.3 million in 2001, with an increase of 27.8% Y-o-Y. This performance is mainly due to a

41.8% gross revenue growth to R\$ 523.2 million in 2000, greater than the market increase, estimated at 38.4%. The performance above market derive from news products (Prever Invest), the company organic growth and of the incorporation of the Bandeirantes Group pension plans portfolio.

Asset Management

- Unibanco Asset Management – UAM, the portion of the business in charge of managing funds belonging to third parties, closed 2001 with a total volume of assets under management of R\$ 20.4 billion, of which R\$ 5.03 billion in private pension funds, a segment in which the company ranks second in the market, according to Anbid data.
- At the end of the year, UAM started rendering back-office services to ABN-Amro Asset Management. It is the first large-scale operation of this kind in the market, significantly strengthening UAM's institutional custody business. The volume involved in the agreement, R\$ 15 billion, will provide immediate benefits: scale gains, and consequently, reduction of unit costs. UAM is strategically positioned to benefit from this market trend, as it is capable of fulfilling, with quality, the needs of its asset management peers.

Technology and the Internet

- In 2001, R\$ 264 million were invested in technology, the main projects:
R\$ 54 million – Cartão Unibanco projects
R\$ 50 million – Mainframe capacity planning
R\$ 46 million – New equipments for the Bandeirantes branches
R\$ 29 million – Internet
R\$ 27 million – MIS (Management Information System)
R\$ 16 million – ATMs capacitation
R\$ 7 million – Brazilian Payment System (Sistema de Pagamentos Brasileiro – SPB)
- New technological infrastructure was implemented in the Luxembourg subsidiary, in order to support the commercial bank's international operations and private banking. This required an investment of roughly US\$ 1.2 million. The new structure will enable centralizing the processing of the international units, ensuring availability and security.
- The quarter was characterized by the inauguration of the new Unibanco.com portal and of the new 30-Hour Online service. With

an innovative format and a more objective and didactic browsing system, the portal and the Internet Banking service performed well in 2001, generating a significant expansion of the online customer base, to 615,000 at the end of the year (growth of 121% for the year). The redesign of Unibanco.com and of the 30-Hour Online service, furthermore, allowed the introduction of products and services specifically developed for the electronic medium.

Investor Relations

- Unibanco's Investor Relations (IR) Site once again won the TOP 5 award, the most important investor relations web award, organized by MZ consult and by Latin Finance magazine. In the fourth year of the award (which, for the first time, encompassed companies from the whole of Latin America), Unibanco continued to be in the TOP 5 – Brazil group, and joined the TOP 5 – Latin American group, occupying the second place, among 280 companies from Brazil, Mexico, Argentina and Chile. Such recognition is the result of investing in the site's improvement, content and updating, as the website is an important relationship tool with investors, stockholders, and capital market analysts. Our website, which was accessed more than 5,400 times from all parts of the world in December 2001, is currently in its fifth version. It is constantly updated, with new, convenient elements and additional information.

Community-oriented Activities

- In connection with the 10th anniversary of *Unibanco Ecologia* (Environment) program, funds were granted for the building of eight environmental education centers, in Florianópolis (state of Santa Catarina), Belo Horizonte (state of Minas Gerais), Vitória (state of Espírito Santo), Goiânia (state of Goiás), Brasília (Federal District), Porto Alegre (State of Rio Grande do Sul), Salvador (state of Bahia) and Recife (state of Pernambuco). Eight philanthropic organizations from these capitals received donations to start up programs in the healthcare area. Pedagogical and environmental campaigns were also developed in beaches in Recife (state of Pernambuco) and São Sebastião

(state of São Paulo). Seedling nurseries were "planted" in Rio de Janeiro, with the expectation of producing approximately 40 thousand seedlings per year.

Organizational Changes

- As of March 1, 2002, certain organizational changes will be implemented in the organization, viewing greater strategic alignment, synergies and cost effectiveness. The Capitalization Company will be integrated into the structure of the Retail Bank, whereas the Private Bank, together with Unibanco Asset Management, will make up a new unit named Wealth Management.
- Cesar Sizenando, current Corporate Vice-President, CFO and Director of Investor Relations will head the Wealth Management area. Geraldo Travaglia, current Executive Director of Unibanco.com, will take up the newly vacant position. Mr Travaglia that headed in the following areas, among others: Retail Marketing and Products, Reengineering, and Control. Jorge Rosas, current UAM President, is to become responsible for managing the Bank's treasury, encompassing both the domestic and the international markets. The current treasurer, Mr. Sergio Zappa, will in turn head Unibanco's Capital Markets Activities as well as current responsibilities for Global Financial Institutions and business platforms in New York, London (including Brokerage Houses) and Interbanco – Paraguay. Adalberto Schettert, Administrative Vice-President, will become responsible for the implementation of cost-effectiveness policies and strategies, in addition to joining Unibanco's Executive Committee.

(1) Each "Global Depositary Share" (GDS) traded abroad (NYSE:UBB) corresponds to 500 Units. Each Unit consists of one Unibanco preferred share plus one Unibanco Holdings preferred B share.

(2) Interest on capital stock distributed in 1S00.

(3) Based on Brazilian Unit prices (Bovespa: UBBR11).

Share Buy-back Plan

Unibanco (UBB) and Unibanco Holdings (UH) share buy-back plan started on September 20, 2001 and was renewed on December 27, 2001 also for a period of three months. Management believes that this plan is in the best interest of both companies' stockholders.

The purpose of such transaction is to hold the shares of UBB and UH preferred B shares as treasury stock for subsequent sale or cancellation, without reduction of the companies' capital. It also aims to use Unibanco's resources available from the Revenue Reserve account.

The shares shall be repurchased at market prices or by means of trading of options. According to CVM regulations issuers may not hold as treasury stock more than 10% of the public float from each class of shares. The new limits for the current repurchase plan were established on 12/27/2001, as follows:

Type of share (per 1000 shares)	Limit for repurchase*
Unibanco PN (UBBR4)	3,177,019,267
Unibanco ON (UBBR3)	257,364,326

Unibanco Holdings

Unibanco Holdings S.A. net income for the year reached R\$ 574 million, of which R\$ 136 million was generated in 4Q01, resulting in earnings per 1000 shares of R\$ 6.83 and R\$ 1.63 for 2001 and 4Q01, respectively. Stockholders' equity on December 31, 2001 reached R\$ 3.7 billion, the annualized ROAE for the year was 16.5% and the book value per 1000 shares stood at R\$ 43.85.

Assets

Total Unibanco assets of R\$ 55.6 billion represented a decrease of 4.2% for 4Q01 and a 8.0% Y-o-Y increase. This drop was mainly due to the *real*/appreciation in relation to foreign currencies and the lower trading position on the overnight market at the end of the fiscal year.

Of the total, R\$ 25.4 billion consisted in the total loan risk portfolio, R\$ 15.5 billion were marketable securities, issued primarily by the federal government, and R\$ 4.7 billion were interbank investments.

(1) Mostly investments held by the insurance companies.

(2) Includes US\$-linked federal government securities.

(3) Reclassification for a better comparison with December, 2001

The R\$ 15.5 billion total securities portfolio at the end of December grew 2.8% and 19.0% over September 2001 and December 2000, respectively, largely due to investments in federal government securities and non-financial debt issues. The portfolio's profile is in line with the market's supply, reflecting longer-term maturities. Non-financial debt consists primarily of eurobonds and corporate debentures. The carrying of these securities is taken into account in the credit evaluation of the issuers, using credit risk allocation. The increase in non-financial securities portfolio in the period is largely due to a higher volume of MRS Logística corporate debentures. The drop in foreign currency securities in the quarter is basically due to the *real* appreciation of 13.1% in relation to the US dollar.

The portfolio also includes securities tied to guarantees and technical reserves of the Unibanco group, such as the relevant R\$ 3.0 billion of Unibanco's insurance, capitalization and private pension plans portfolio in December 2001, mainly being constituted of technical reserves.

Loan Portfolio

The R\$ 25.8 billion total loan risk portfolio grew 1.5% and 16.6% over September 2001 and December 2000, respectively.

* Investcred and Credi Luiza consolidated since December, 2001

The economic slowdown and local currency volatility impacted export and import financing, which decreased by 14.5% Q-o-Q. For the last twelve months this figure fell R\$ 511 million.

The volume of credit offered to individuals increased Q-o-Q, mainly due to the consolidation of 50% of Investcred by Unibanco adding R\$ 291 million. A growth amounting to R\$ 66 million was also registered at Banco Dibens' motor vehicle portfolios.

In December 2001 the Wholesale Bank client list was reviewed according to their annual sales (Middle Market: from R\$ 25M to R\$ 100M; Large Corporate: above R\$ 100M). For this reason, some Middle Market clients were transferred to the Large Corporate segment. September 2001's figures are *pro forma* for a better comparison of the periods.

Allowance for Lending, Leasing and Other Credits Losses

At the end of December 2001, consolidated allowance for lending, leasing and other credits losses, pursuant to the Central Bank of Brazil Resolution 2682, totaled R\$ 1,538 million, down 1.7% Q-o-Q and representing 6.0% of total credit risk. These provisions were:

- ✓ R\$ 651 million or 42.3% of the total, established to cover overdue credits, bankruptcies and insolvencies;
- ✓ R\$ 716 million or 46.6% of the total, for the risk on credit transactions, under Resolution 2682 and credits to mature; and
- ✓ R\$ 171 million in addition to the minimum required provision, based on a more conservative percentage than that required by the Central Bank. This latter being R\$ 32 million higher than 3Q01.

Unibanco's overall funding reached R\$ 63.7 billion by December 31, 2001, down 1.1% and up 5.5% over the last three and twelve months, respectively. Total funding includes R\$ 20.4 billion in assets under management. Total local and foreign funding decreased 2.8% over the quarter to R\$ 43.3 billion on December 31, 2001.

Local funding rose 2.3% over the last three months to R\$ 32.5 billion, mainly due to the growth in savings, time deposits and funds for BNDES onlendings.

The organic growth and the "Poupança Premiada" campaign with draws prizes an increase of 12.5% and 27.7% in the savings balance over the quarter and the year, respectively. The market rose 5.8% and 19.4% in the same periods. The new CDB system launched in the previous quarter contributed with the time deposits balance growth.

Foreign funding posted a drop of 15.6% over the quarter totaling R\$ 10.8 billion at the end of December 2001. Unibanco's import and export lines were most affected showing a drop of 25.1% in 4Q01 mainly due to the *real* appreciation and the commercial balance performance. When compared to December 2000 figures, the portfolio remained stable.

Funds and portfolios under UAM's management were up 2.7% Q-o-Q, from R\$ 19.9 billion at the end of September 2001 to R\$ 20.4 billion at the end of December 2001, being stable when compared to December 2000.

Insurance, Capitalization and Pension Plans

Unibanco's Insurance, Capitalization and Pension Plans companies, posted consolidated gross revenues of R\$ 2.2 billion in 2001, up 23.8% Y-o-Y. Gross revenues totaled R\$ 623 million for 4Q01, with 14.9% increase over 3Q01. Net income of the companies totaled R\$ 216 million in 2001 and R\$ 51 million in 4Q01, 12.1% below the 3Q01 and 21.4% above 4Q00.

Technical reserves managed by the companies totaled R\$ 2.3 billion at the end of the period, showing an increase of 11.5% Y-o-Y and 3.9% Q-o-Q.

Insurance

Unibanco Seguros and AIG Brasil in 2001 started operating as a single brand – Unibanco AIG Seguros & Previdência. Gradually, AIG Brasil and Unibanco Seguros merged their operational and administrative areas. The new brand combined with the incorporation of Trevo Seguradora and Trevo Banorte Seguradora – Banco Bandeirantes' companies – contributed to the strong growth of the period. AIG Brasil still operates offering its products to banks that do not operate their own insurance business.

The Insurance companies generated a net income of R\$ 162.4 million in 2001, up 11% Y-o-Y, of which R\$ 81.6 million contributed to Unibanco's results. Net income in 4Q01 amounted to R\$ 33 million, down 25% compared to 3Q01 due to the *real* appreciation vis à vis the US dollar which adversely affected the result of part of the company's reserves. If we exclude the *real* appreciation effect, *pro forma* net income in 4Q01 and 2001 would be R\$ 59 million up 34.1% and R\$ 188.4 million up 29.0%, respectively.

Net premiums issued of R\$ 1,413 million in 2001 increased 23.1% Y-o-Y, above the 4% projected growth of the sector, due to the incorporation of the insurance companies Trevo and the company organic growth. Net premiums during 4Q01 reached R\$ 398 million, up 11% vs. the previous quarter - a growth substantially superior compared to the market projection for the quarter of 0.5%.

The insurance company's technical reserves reached R\$ 657 million in 2001, up 16.7% Y-o-Y.

(1) (Operating expenses + administrative expenses + selling expenses) / premiums earned.

Unibanco's insurance companies posted administrative expenses of R\$ 194 million in 2001, up 10.8%. When the base of the previous year was adjusted, *pro forma*, for the acquisition of the Trevo and Trevo Banorte insurance companies, there was a reduction in expenses amounting to R\$ 28 million, i.e., a 12.6% reduction over the period, reflecting the benefits of the merge of its commercial activities implemented early in the year. In 4Q01, administrative expenses totaled R\$ 48 million, being stable compared to the previous quarter.

The insurance companies consolidated combined ratio of 99.6% in 2001 improved 150b.p. compared to the previous year ratio, and lower than the market projected average of 103%. The drop in combined ratio results from distinguished policies on underwriting, prevention and regulation of claims.

The insurance companies seek to focus their production on effective risk-return products.

Capitalization

Unibanco Capitalization generated net income of R\$ 53.7 million in 2001, increasing 34% Y-o-Y over the recurring net income, when excluding the extraordinary impact of tax litigation contingency reversal. Such performance is due to the change in the MegaPlin product features, increasing its profitability by 8%. Net income of R\$ 18 million in 4Q01 was up 28.6% Q-o-Q.

Gross revenues reached R\$ 248 million in 2001 and R\$ 64 million in 4Q01. The company closed the period with technical reserves of R\$ 232 million and total assets of R\$ 414 million.

Private Pension Plans

Unibanco AIG Previdência posted R\$ 23.3 million in net income in 2001, up 27.8% Y-o-Y. In 4Q01 net income totaled R\$ 5 million, in line with 3Q01. Such performance is due to higher premiums totaling R\$ 523.2 million

in 2001, up 41.8% Y-o-Y, above the market growth for the period of 38.4%. This growth above the market levels was due to the launch of new products (Prever Invest) combined with the company's organic growth and the incorporation of the private pension plan portfolio of the Bandeirantes group amounting to R\$ 36 million.

The company services approximately 477,000 individual customers and 785 corporate customers, consolidating its leadership in the Large Corporate segment of the market.

Pension Plan Premiums - R\$ Million

Technical reserves stood at R\$ 1.48 billion on December 31, 2001, a 24% rise over December 2000. As a result, the company maintained its 3rd place ranking in technical reserves, based on preliminary data for December 2001 from ANAPP (National Private Pensions Association).

Credit Cards

In the credit card segment, Unibanco operates through **Credibanco (Cartão Unibanco)**, **Credicard Group (Credicard, Redecard and Orbitall)** and **Fininvest Cartões**. The companies posted a good performance in 2001, reinforcing Unibanco's leadership in this market.

Credibanco (Cartão Unibanco)

Credibanco S.A. incorporated the Cartão Unibanco company in April 2001; with the Cartão Unibanco brand being maintained as a trade name, due to its strong marketing appeal. The company's name was changed to Banco Credibanco S.A., thus, Credibanco became a bank focused on the credit card business within the Unibanco group.

Credibanco (Cartão Unibanco) net income reached R\$ 92 million in 2001, a 91.7% Y-o-Y increase as a result of the incorporation of Cartão Unibanco by Credibanco and the incorporation of Banco Bandeirantes cards base which expanded its clients base and scale.

Credibanco *pro forma* results in 2001 was R\$ 21 million, being the credit cards business net income R\$ 71 million in the period, up 47.9% in the year. In 4Q01, the company net income totaled R\$ 33 million, a 43.5% increase over 3Q01 due to the seasonality of the credit cards market. Other relevant factors were the launch of new products and the increase in the use of credit cards as a means of payment. Consequently, the company's total volume, measured by cardholder purchases and cash advances, reached R\$ 4.2 billion against R\$ 3.3 billion in 2000, a 27.3% increase. Total outstandings reached R\$ 308 million, 42.7% above the R\$ 216 million posted in 2000. The total number of cards issued reached 3.5 million in 2001 against 2.5 million in 2000, representing a 40% growth and raising the company's market share from 9% to 10%.

Grupo Credicard

The Credicard group companies - **Credicard**, **Redecard** and **Orbital** – Brazil's credit card market leaders, posted R\$ 495 million and R\$ 110 million in net income for the year and the quarter, respectively, up 45.2% in the year.

Results were up by 8.77% Q-o-Q, when excluding the extraordinary impact in 3Q01 of a favorable judicial sentence for fiscal contingencies. As for the full year, the billings benefited from the good performance of the credit card market, which grew by 24.9%, as well as from stable spreads when compared to the previous year.

Of the total income of the Credicard Group's companies, R\$ 199 million had an impact on Unibanco's 2001 results, of which R\$ 48 million in 4Q01. The Credicard Group's billings amounted to R\$ 26.8 billion in 2001, up 23% Y-o-Y.

Fininvest Administradora de Cartões

During 2001, Banco Fininvest became the issuer of Fininvest brand cards. As a result, Fininvest Administradora

de Cartões became a provider of administrative and operating services to Banco Fininvest and was renamed Fininvest Negócios de Varejo (Fininvest Retail Business), remaining as a subsidiary of Banco Fininvest.

Banco Fininvest (Fininvest)

Fininvest provided equity in results amounting to R\$ 50.2 million in 2001 with growth of 108.3% vis-à-vis year 2000. ROAE was 27.7%. The 4Q01 net income was impacted by an additional preventive provision of R\$ 31 million above the minimum percentages required, and R\$ 7.5 million in expenses arising from business expansion projects. The company ended the period with R\$ 1.6 billion in loans, R\$ 2.2 billion in assets, approximately 3.9 million active clients and 102 stores in the main cities in Brazil.

In the year, Fininvest continued to implement its outlet network expansion plan. The objective is to reach C and D lower income segments on a broad scale, through the inauguration of 38 new stores throughout Brazil. These stores performed well both in terms of volume and results, many of which have posted faster paybacks than the expected 18-month planned period.

Still based on the strategy of enhancing growth and profitability, Fininvest signed partnerships with the Pão de Açúcar, Extra and the Barateiro supermarket chains, among others, to issue private label cards for their customers. Initially this operation impacted the corporate results negatively by R\$ 3.1 million, before taxes, due to start-up investments, which should be reversed during 2002.

In 2001, studies were initiated on the synergy gains – totaling R\$ 57 million – over an expense base amounting to R\$ 699 million from Fininvest, Cartão Unibanco (Credibanco) and Unibanco were started, by merging common activities, eliminating overlaps, streamlining processes and company structures. This measure had already positively impacted the 2001 results – roughly R\$ 7.5 million, before tax. More substantial impacts should materialize in the next two years.

Fininvest administrative expenses totaled R\$ 394 million for the year and R\$ 115 million in 4Q01, with a change of 20.1% in the year and 21.1% in the quarter, due to the expansion of the network and the establishment of new partnerships, as mentioned in the preceding paragraphs.

Investments in the company's expansion projects totaled R\$ 40 million over the full year and R\$ 10 million in 4Q01, with a negative impact of R\$ 15 million and R\$ 7.5 million on the year's and the 4Q01's results, respectively.

In October 2001, Banco Fininvest S.A. acquired 50% of the Credi Luiza capital stock, as a result of the Unibanco's association with Magazine Luiza, with the objective of financing its clients. Consequently, the financial statements of Credi Luiza are consolidated within Banco Fininvest S.A.

Banco Dibens

Banco Dibens' 2001 net income reached R\$ 28 million up 211.1% over the R\$ 9 million posted in the previous year. 4Q01 net income totaled R\$ 8 million, increasing 33.3% Q-o-Q. The bank ended the year with a R\$ 1,090 million loan portfolio, up 45.7% over 2000 and 6.0% over 3Q01.

Leasing

Unibanco Leasing's net income was impacted by the sector's general contraction and mainly due to the incorporation of Leasing Bandeirantes. In payment for the company, in January 2001, UBB Leasing reduced its securities portfolio by R\$ 140 million. Additionally, in order to standardize criteria, R\$ 17 million were provisioned before taxes, for fiscal contingencies and R\$ 5 million for goodwill's amortization.

Asset Management

Our subsidiary Unibanco Asset Management (UAM) ended December 2001 with R\$ 20.4 billion in assets under management, down 0.3% in the year and 2.7% in the quarter.

Income arising from assets under management totaling R\$ 248 million during 2001 posted a 13.2% rise when compared to the previous year due to changes in the product mix. In 4Q01, these revenues totaled R\$ 62 million, or at the same level of the previous quarter.

In the private pension fund segment, UAM had R\$ 5.028 billion under management, equivalent to a 13.4% market share at the end of December 2001, according to Anbid (the National Investment Banks Association), ranking the company 2nd in this market.

At the end of the year, UAM started rendering back-office services to ABN-Amro Asset Management. It is the first large-scale operation of this kind in the market, significantly strengthening UAM's institutional custody business. The volume involved in the agreement, R\$ 15 billion, will provide immediate benefits: scale gains, and consequently, reduction of unit costs. UAM is strategically positioned to benefit from this market trend, as it is capable of fulfilling, with quality, the needs of its asset management peers.

During this fiscal year, a new distribution channel was created - Alternative Channels - targeting a sophisticated market, namely, other financial institutions and consultants. These are portfolio or asset managers interested in offering the market's best funds to their customers, largely private banking clients. Although still modest, the volume of funds managed doubled in four months of operation.

Performance Overview

The Brazilian Economy

In 2001, the economic outlook was characterized by a strong reversal of expectations. GDP growth, at 2%, was below the originally expected 4%. At the end of the year the interest rate (Selic) stood at 19% per year, whereas a falling trend had been anticipated. Inflation, as measured by the IPCA, reached 7.7%, above the year's 6% target.

Several elements led to these reversals. The slowdown of the US economy was worse than expected and its

effects reached other continents. The Argentine crisis lingered on impacting international markets risk perception for the region. On the domestic front, the energy rationing increased concerns as to the availability of this strategic resource. The perception of such circumstances led to growing doubts as to Brazil's capacity to finance its balance of payments, which in turn put pressure on the *real* in the forex markets. Consequently, a greater than expected exchange rate devaluation ended up having an adverse impact on inflation, leading monetary authorities to adopt higher interest rates policy.

Nonetheless, the relevance of these impacts on the performance of Brazil's economy in 2001 highlighted a strong capacity to overcome adversity and attraction as regards its potential. Inflation remained below 8% and foreign direct investments is estimated to have reached US\$ 23 billion. Total credit expanded 4.2%, whereas the private financial sector grew by 21%. Trade balance accounts posted a US\$ 2.7 billion surplus. This figure, although modest, was the first surplus since 1994.

The *real* appreciated 13.1% in the quarter, closing the year at R\$ 2.32/US\$. The exceptional performance of the trade balance in 4Q01 (a US\$ 1.4 billion surplus) was a chief factor in driving the reversal of the currency devaluation trend. The quarter's IPCA consumer price index, still high at 2.2%, kept the Central Bank from reducing the Selic interest rate. Industrial activity fell by 3.6% during the last quarter, but in seasonally adjusted terms it was stable relative to the third quarter. Total credit granted by the financial system also remained essentially stable in the last quarter.

Results

Below are financial intermediation revenues, expenses and income, for the periods indicated:

2001's financial intermediation revenues of R\$ 10.2 billion rose by 51.5% over the previous year, mainly because of the credit growth due to the consolidation of Banco Bandeirantes and, the additional 50% from Banco Fininvest (December, 2000), and as a result of the organic growth of the businesses. In 4Q01, revenues from dollar indexed loans and securities contracted as a result from the *real* appreciation. The *real* appreciation also reduced financial intermediation expenses when compared to previous quarters.

Allowances for Lending, Leasing and Other Credits losses totaled R\$ 1,650 million for the year and R\$ 489 million in 4Q01. The increase in both, the annual and quarterly provisions are largely due to higher expenses in the low-income consumer finance segment. Fininvest, Credi Luiza and Investcred together posted expenses of R\$ 686 million in the year and R\$ 220 million in 4Q01. Although this is high relative to the balance of the portfolio, these are characteristics of the low-income customer segment, which combines high spreads with higher operating losses and costs, given the low value of the average ticket, is not compatible with service in traditional bank branches services. Provisioning expenses are detailed below in the section Allowances for

Lending, Leasing and other Credits Losses.

The average spreads of products, particularly those of the Retail Bank, posted positive oscillations in comparison to the previous quarter, largely because of the mix of products (eg. overdraft, personal credit, consumer finance). Within the Wholesale Bank, the larger volume of onlending transations in local currency also favored better spreads.

To sum up, result of the financial intermediation before the Allowances for Credit of R\$ 1.5 billion in the 4Q01, was up 11.5% over 3Q01. The unfavorable effects of the foreign exchange over the portfolios were outweighed by volume growth and proper risk management.

Total Net Other Operating Income and Expenses, at negative R\$ 202 million in 4Q01, was R\$ 269 million - lower to 3Q01. This is due to the *real* appreciation, as this item includes gain and losses from investments abroad net of hedging effects.

Unibanco's investments in branches and subsidiaries abroad, totaling R\$ 2.3 billion in December 2001, were partially hedged in 4Q01. The resulting net impact of the *real* appreciation during the quarter was of R\$ 210.3 million, as shown below:

Total provisioning expenses for the 4Q01 were R\$ 489 million, compared to R\$ 346 million in 3Q01 and R\$ 365 million in 4Q00. Those provisions were constituted in accordance to the Central Bank Resolution 2682. The performance of the credit portfolio in the segments of credit cards and low-income customers pressured those expenses upwards - a feature of these segments, as previously mentioned. Additional provisions above requirements of R\$ 44 million were kept for the credit card business and R\$ 31 million for Fininvest/Credi Luiza and Investcred.

Income for Services Rendered

Below is the breakdown of Unibanco's consolidated income for services rendered in the periods indicated:

Fee income for 4Q01 totaled R\$ 588 million, a 5.0% Q-o-Q increase and a 25.1% increase when compared to 4Q00. In 2001, total fee income of R\$ 2,185 million grew by 33.2% over last year.

Banking fees amounted to R\$ 283 million in the 4Q01, a 3.7% increase from the previous quarter, and 24.1% over 4Q00. This growth resulted from the successful efforts of our organic growth plan ContAtiva, and the wider range of products offered to our customers.

4Q01's revenues in the credit card business rose 7.5% comparing to the 3Q01 due to the seasonal behavior of this market with the volume of transactions up 9% Q-o-Q.

Asset management fees rose 13.2% Y-o-Y due to the change in the products mix. In 4Q01 these fees remained stable.

In 4Q01, the R\$ 1,010 million of total personnel and administrative expenses fell R\$ 61 million, or 5.7% when compared to 3Q01. In 2001 the expenses amounted to R\$ 3,963 million - 32.0% higher than the previous year due to the Bandeirantes acquisition, the remaining 50% of Fininvest, collective bargaining and organic growth, *Pro forma*, when adjusting the previous year by the Bandeirantes acquisition, the Multiple Bank + Bandeirantes' expenses were down 2.9%, from R\$ 2,637 million for 2000 to R\$ 2,561 million for 2001. The consolidated vision demonstrates an increase of 4.8%. In other affiliates and subsidiaries, the increase over the year, refers basically to the following companies:

- **Insurance, Capitalization and Pension Plans:** R\$ 27 million in personnel and R\$ 17 million in administrative expenses due to the incorporation of Trevo and Trevo Banorte insurance companies and by the absorption of AIG Brasil (not consolidated) administrative and operational activities;
- **Banco1.net,** R\$ 10 million in personnel and R\$ 21 million in administrative expenses due to the re-structuring of the bank as an independent company;
- **Tecnologia Bancária (TecBan):** R\$ 3 million in personnel and R\$ 11 million in administrative expenses due to stake expansion (from 19.1% to 24.1%), higher volume of transactions and expenses resulting from equipment remodeling;
- **Serasa Company:** R\$ 8 million in personnel and R\$ 12 million in administrative expenses due to stake expansion (from 14.6% to 19.1%) and higher volumes;
- **Credicard:** R\$ 3 million in personnel and R\$ 45 million in administrative expenses due to higher billings and transactions volume increase.

(1) Consolidated in December 2000.

(2) Until November 2000 only 50% was consolidated.

The Multiple Bank's 4Q01 personnel expenses of R\$ 271 million decreased 13.7% from 3Q01, mainly due to the completion of Banco Bandeirantes' integration. Fininvest posted an increase related to the expansion plan of the company's network and activities which called for increase in headcount.

The consolidated administrative expenses of R\$ 617 million in the 4Q01 are 2.5% less than the previous quarter. In the Unibanco Multiple Bank plus Banco Bandeirantes the expenses raised just 1.6% even considering the readjustments of mailing expenses, phone services and data processing, as well as higher expenses with money preparation and transport, telemarketing and marketing. In other subsidiaries, including Fininvest, the administrative expenses showed improvement of 8.4% over the quarter.

Main Performance Ratios

Below are Unibanco's main consolidated performance ratios in the periods indicated:

Performance %	4Q01	3Q01	4Q00	2001	2000
Service fees / Personnel and administrative expenses	58.2	52.3	52.7	55.1	54.6
Service fees / Personnel expenses	149.7	128	136.1	136.3	140.8
Efficiency ratio ⁽¹⁾	58.4	58.4	64.7	58	60
Annualized net financial margin ⁽²⁾	12.1	10.7	10.1	10.7	9.9

(1) (Personnel Expenses + Other Administrative Expenses) / (Net Income from Financial Intermediation + Provisions for Loan Losses + Fee Income + Insurance, Capitalization and Pension Plans Premiums + Changes in technical provisions for insurance, capitalization and private retirement plans + Claims + Private Retirement plans benefits expenses + Selling and other insurance and private and private retirement plans expenses + Credit card selling expenses + Taxes + Other Operating Income - Other Operating Expenses).

(2) (Net Income from Financial Intermediation + Provision for Loan Losses) / (Average Total Assets - Average Permanent Assets).

The 4Q01 efficiency ratio of 58.0%, showed improvement when compared to the 60% ratio posted in 2000. Over the quarter, it remained stable, despite of the *real* appreciation.

At the end of December 2001, the Unibanco group, including its subsidiaries, Bandeirantes and Fininvest, had 29,704 employees, compared to 29,673 at the end of September, 2001. This increase was mainly a result of Fininvest's network expansion and partnerships with supermarkets and retailers.

Efficiency Ratio and # of employees

The 4Q01 annualized net financial margin was 12.1%, above the 3Q01 ratio of 10.7%, as the portfolio growth and product mix effect as well as appropriate risk management surpassed the unfavorable effects of the exchange rate during the quarter, as mentioned before.

1. To the Shareholders

During 2001, Unibanco achieved record net income of R\$972 million, 31.5% higher than the 2000 results, which had previously been the highest ever. Return on average shareholders' equity reached 16.8%. R\$323.2 million in dividends was distributed to shareholders, a 22.5% increase relative to the preceding fiscal year. Earnings per 1000 shares of R\$6.95 rose by 15.4%, in line with the proposed objective of maintaining a consistent growth of 15% per year. In 2001, the bank achieved notable gains in scale, thanks to its successful organic expansion and its timely acquisitions and partnerships policy.

During the year, Unibanco's position was consolidated through strategic actions that strengthened its philosophy of combining growth with sound management practices. During the second half of the year, two partnerships enabled the customer base to grow at acceptable costs: in August, Unibanco announced an association with Globex-Ponto Frio, giving shared control of Banco Investcred, whose name was changed to Investcred Unibanco. In September, through its affiliate Banco Fininvest, Unibanco entered into an association with Magazine Luiza, a department store chain, for the establishment of a shared company, Credi Luiza. The new company will finance the retail chain's customers.

In October 2001, Unibanco completed the integration of Banco Bandeirantes. 523 sales points were migrated, merged or closed, taking into account both regular branches and corporate site branches. The transition was orderly and the satisfaction of the new customers was ensured, proven by the high 95.6% account maintenance level. The financial results of the integration process were better than expected. It was initially estimated that the Bandeirantes cost structure would fall by 35%, whereas the actual annualized savings, by the end of the year, reached 42%.

On the organic growth front, within the ContAtiva (ActiveAccount) Program, the bank received 852,000 new account holders, a figure above the established target of 720,000, and one that demonstrates the clear tendency to reach the initial objective of opening 1.8 million current accounts by December 2003 earlier than planned. Investment in the program is estimated at R\$180 million during the 2001-2003 period.

Unibanco reached the end of the year with 5.2 million customers, which, added to 3.9 million active Banco Fininvest customers, and the customers of the Investcred Unibanco and Magazine Luiza financial companies, totaled 13.1 million clients. This figure is 70% higher than in December 2000. The servicing network of the Unibanco group reached the end of 2001 with 1,485 sales outlets throughout the country, including 809 regular branches, 497 corporate site branches, 77 in-store branches and 102 Fininvest stores. Bank account holders rose by 15% to 3.5 million, with an underlying productivity increase in the points of sale.

Other business areas of the group also contributed significantly to organic growth. The Wholesale Bank consolidated its leadership in onlendings of funds from the BNDES (National Bank for Economic and Social Development), with R\$1.8 billion having been disbursed. This figure accounts for 11% of the market. In structuring operations and distribution of fixed income securities, the Wholesale Bank reached a business volume of R\$3.1 billion, 48% higher than what it attained in 2000. Its market share reached 19%. Moreover, it firmly established its position as the biggest Brazilian bank in the area of mergers and acquisitions - a market share of 5.5% amongst its Brazilian peers. Regarding the Insurance and Private Pension fund business, Unibanco AIG Seguros e Previdência grew by 23.8%, taking into account premiums issued and invoicing, which reached R\$2.2 billion. Unibanco Asset Management - UAM, which manages third party funds, closed the year with a total volume of funds under management of R\$20 billion, including R\$5.0 billion in private pension funds, which consolidated UAM's position as the second largest manager in this segment.

2. Macroeconomics

2001 did not unfold in line with original expectations: GDP growth only reached 2%, half of the 4% expected at the beginning of the year, whereas the interest rate, contrary to what had been anticipated, tended to rise, reaching the end of the 2001 at 19% per year. The annual average interest rate was 17.3%, largely unchanged vs. the previous year's rate. Inflation, as measured by the IPCA consumer price index, reached 7.7%, above the 6% inflation cap target for the year.

Several factors justified the disparity between expectations and 2001 results. On the foreign front, the Argentine crisis dragged on far longer than reasonably to expected, whereas the US economy cooled down more than foreseen, a process magnified by the September 11 terrorist attacks. On the domestic front, the enforced power rationing gave rise to a great deal of concern as to the availability of energy resources. It even had an impact on consumer confidence, as well as anticipating debates on the presidential succession. The increased

ANNUAL MANAGEMENT REPORT - 2001

deterioration of the external scene gave rise to fears as to how the balance of payments would be financed in 2001 and 2002, which put further pressure on the exchange rate during the year. The marked devaluation of local currency affected the stability of inflation, causing the Central Bank to reverse the falling interest rate trend.

Although the 2001 economic facts were far removed from initial expectations, the turbulence confirmed that the Brazilian economy had solid fundamentals and was capable of resuming sustained growth. The economy grew, inflation stayed below 8%, and the trade balance reacted to currency devaluation, leading the country to attain a US\$2.7 billion surplus, which, although modest, was the first surplus since 1994.

Regarding financial market performance, the reversal of the falling interest rate trend and the lower growth of the economy caused the expansion of credit to be lower than originally envisaged. Nevertheless, the financial sector expanded total credit for the year by 4.2%. The private financial sector posted an expansion of 21%. Three major thrusts characterized the banking industry in 2001: the process of financial recovery and capitalization of federal government banks, the ongoing process of privatization of state banks, and the system's continued trend toward consolidation.

For Unibanco, the changes in the course of the economy were felt in the lower than expected growth of some products, resulting in many instances from increased caution in carrying out business activities, such as in the field of credit. These corrections, however, did not keep the bank from attaining record results last year.

3. Income, Dividends and Shareholders' Equity

Unibanco's 2001 net income reached R\$972 million, 31.5% better than its 2000 results. Return on average shareholders' equity reached 16.8%. Net shareholders' equity reached R\$6.1 billion on December 31, 2001, which corresponds to a book value per 1000 shares of R\$43.82.

Unibanco paid its shareholders R\$323.2 million in dividends (an amount 22.5% higher than what was disbursed the previous year), which corresponded to R\$2.44 per 1000 preferred shares, R\$2.22 per 1000 common shares and R\$4.67 per 1000 Units.

4. Performance Overview

In 2001, financial intermediation revenues reached R\$10.2 billion, with a 51.5% growth in the year, largely due to the organic expansion of business, which led to a growth of credit portfolios, and to the consolidation of Banco Bandeirantes and of the additional 50% of Fininvest, both of which took place in December 2000.

During the course of the year, the average spreads of the product portfolios, particularly in the Retail Bank, fluctuated basically as a result of the rise in interest rates and a more profitable product mix. In the Wholesale Bank, the greater participation of onlendings in local currency also encouraged better spreads.

Financial intermediation expenses, in turn, reached R\$4.8 billion whereas allowances for lending, leasing and other credits losses stood at R\$1.7 billion. The total result of financial intermediation rose by 41.4%, to R\$3.7 billion.

Revenues from services rendered advanced 33.2%, reaching R\$2.2 billion, reflecting the increase in the number of products per client during the period and the degree of new bank account activation. Administrative and personnel expenses reached R\$4 billion during the fiscal year, having suffered the impact of the acquisition of Bandeirantes and the other 50% of Fininvest, of the collective bargaining agreement and of organic growth.

Unibanco's consolidated operating income in 2001 reached R\$1.2 billion, 62% better than the previous year.

The 2001 net financial margin was 10.7%, higher than 2000's 9.9%. The year's 58% efficiency ratio was better than the 60% ratio attained in 2000.

5. Assets and Liabilities

The Group's total assets reached R\$55.6 billion in December 2001, against R\$51.5 billion in December 2000. R\$25.4 billion of the asset total consisted of loan operations, leasing and other credits. R\$15.5 billion represented its investments and the securities portfolio (mainly federal government securities), whereas interbank liquidity investments amounted to R\$4.7 billion.

Unibanco's consolidated provisions for non-performing loans, calculated by Central Bank of Brazil Resolution 2.682, totaled R\$1.5 billion at the end of 2001, representing 6% of the total credit risk. R\$651 million, or 42.3% of the total, was provisioned to cover overdue payments, bankrupt companies, and companies under court-supervised agreement with creditors, whereas R\$716 million, or 46.5% of the provision, refers to the levels of risk of the operations and payments not yet due. In addition to the required minimum provision, Unibanco maintained a R\$171 million provision, based on more conservative percentages than those required by law.

Unibanco's total funding, including portfolios and investment funds under management amounting to R\$20 billion, totaled R\$63.7 billion at the end of the year, reflecting a growth of 5.5% over the December 31, 2000 balance.

6. Retail Bank

The Retail Bank reached the end of the 2001 fiscal year with a total portfolio of account holders, savings account clients, pensioners, Fininvest customers and customers of its financial companies amounting to 13.1 million. The expansion was significant, made possible largely by maintaining the ContAtiva (ActiveAccount) Program, as well as by the successful process of Banco Bandeirantes integration and the strategic partnerships signed with Globex/Investcred and Credi Luiza.

Designed to foster organic growth, the ContAtiva (ActiveAccount) Program, which started in October 2000, attained significant results in 2001. The target of opening 720,000 bank accounts was exceeded as roughly 852,000 new bank accounts were opened.

Note: includes savings and pensioners. In Dec/01 Bandeirantes fully integrated

Scale gains were achieved and with quality. The activation index reached 98% among bank accounts achieved, which, in conjunction with the customer base that came from acquisitions, reflected favorably on the Bank's results.

In 2001, Unibanco established some important partnerships. The strategic association with Globex-Ponto Frio in August had the purpose of providing credit and offering services and products to the retail chain's customers. In September, through its affiliate Banco Fininvest, Unibanco entered into an association with Magazine Luiza (a department store chain with a strong presence in the interior of São Paulo state, western Paraná state and southern Minas Gerais state) to establish a shared company. The new company, Credi Luiza, will finance the retail chain's customers. Both chains are strongly complementary. Together, they account for 461 points of distribution to which Unibanco acquired access. Through these partnerships, Unibanco gained greater participation in the direct consumer credit market among the C and D lower income classes, the segment of Brazil's population with the greatest potential for growth in terms of absorption of financial products.

Another partnership announced in 2001 was between Banco1.net and Investshop, Brazil's largest financial services portal. Banco1.net is a unique product in terms of Internet services, developed to target a very exclusive market niche which lacked a major portal outlet.

Unibanco's retail credit operations, including Fininvest, Cartão Unibanco, its 33% stake in Credicard, Banco Dibens, Investcred Unibanco and Credi Luiza, posted outstanding results in 2001. The portfolio, which reached R\$11 billion in December, rose by 17.4% against the previous year. This expansion was driven by organic growth and partnerships as well as the fine-tuning of tools such as credit scoring and the completed implementation of our database marketing project. This gave us faster access to data and, consequently, more rapid credit approval. It also made it easier to offer pre-approved credit lines and to close loan contracts through any channel. The portfolio of the overdraft checking accounts and personal credit rose by 30.6% and 19.4% respectively, in 2001.

In the credit card segment, the incorporation of Cartão Unibanco by Credibanco S.A., now renamed Banco Credibanco – the group's bank dedicated to the credit card business - was noteworthy in 2001. Total cards issued reached 3.5 million, a growth of 40% over December 2000. Billings measured by volume of customer purchases and drafts reached R\$4.2 billion against R\$3.3 billion of the previous year, a 27.3% growth. Average financed volume reached R\$308 million against R\$216 million in 2000, or 42.7% growth. Credibanco – the

Cartão Unibanco brand – had net income of R\$92 million in 2001. This 91.7% growth was a result of the incorporation of Cartão Unibanco by Credibanco and the incorporation of the Banco Bandeirantes cards base, enlarging its client base and generating scale gains.

Unibanco also operates in the credit card market through its approximately 33% stake in Credicard S.A., Orbitall S.A. and Redecard S.A. These three companies contributed R\$199 million to Unibanco's income during the period. The 2001 billings of these companies - R\$26.8 billion, - rose by 23% over the previous year.

In the direct consumer credit segment, the Fininvest subsidiary attained net income of R\$50 million in 2001, against R\$24 million in 2000. The balance of the company's credit operations reached R\$1.6 billion in December 2001, while total assets stood at R\$2.2 billion.

7. Wholesale Bank

Throughout 2001, Unibanco's wholesale bank focused on its strategy of combining the power of a major commercial bank with the speed and agility of a leading investment bank to aid in Brazil's development. With a customer coverage structure that combines sector intelligence with regional offices, the Wholesale Bank worked with:

- 1,500 Large Companies (with sales in excess of R\$100 million)
- 2,050 Medium-sized Companies (with sales from R\$25 -100 million)
- 300 Institutional Investors
- 4,700 Investors in the Private Banking segment

The Wholesale Bank has been consistently consolidating its position in the chief segments in which it operates, as shown below:

ANNUAL MANAGEMENT REPORT - 2001

In capital markets, Unibanco ranked first for the second year running in terms of originating and distributing fixed income securities, according to Anbid, the National Association of Investment Banks (*Associação Nacional dos Bancos de Investimentos*), with a subscription volume of R\$3.1 billion in transactions where it acted as Coordinator. This represents a 19% market share. This allowed Unibanco to rank second among new domestic issues in Latin America, according to Thomson Financial. In the equity segment, Unibanco coordinated the Brazilian tranche of Embraer S.A.'s R\$1.8 billion Global Secondary Offering of Preferred Shares and was the contract coordinator for Petrobras S.A.'s R\$1.7 billion Global Secondary Offering of Preferred Shares. It was also the coordinator of the offering that took CPEE – Cia. Paulista de Energia Elétrica (the *Paulista* Electric Power Company) public.

Loan Portfolio - Wholesale Banking R\$14.3 billion

In 2001, financing operations totaled R\$14.3 billion, up 16% year over 2000.

In project finance, Unibanco reached the end of the year with assets related to BNDES (National Bank for Social and Economic Development) onlendings of R\$3.6 billion and loan disbursements totaling R\$1.8 billion (of which R\$687 million came from within the BNDES-exim program), thereby consolidating its leadership in this segment, with an 11% market share. Unibanco began 2002 as advisor to more than 40 projects in the following industries: telecoms, electric energy (including co-generation), oil and gas, sanitation infrastructure, transport, automobiles, pulp and paper and beverages.

The bank is also a leader in Vendor and Compror operations, ending the year with a 14.5% market share and a volume of transactions amounting to R\$1.0 billion, 15% higher than in 2000.

Regarding syndicated loans, Unibanco took part in 25 transactions, having made approximately R\$6.5 billion available to its clients. These transactions include: the coordination of the unwinding of CSN - Companhia Siderúrgica Nacional (a major steel company) and CVRD – Cia Vale do Rio Doce (Brazil's largest mining company) cross shareholdings, a R\$1.9 billion operation; a R\$710 million loan to the Itá Hydroelectric Power Station; a R\$600 million loan to the suppliers of Ford Amazon; and the renewal of the foreign loan of US\$410 million to AES Sul.

In mergers, acquisitions and privatizations, Unibanco completed 11 transactions in 2001, resulting in a 5.5% market share, the highest among Brazilian banks.

ANNUAL MANAGEMENT REPORT - 2001

In Cash Management, Unibanco increased its revenues by 11% to R\$290 million. Ongoing investments in technology enabled Unibanco to increase the number of users of its cash management services by 38% in 2001 to 51,300. The volume of individual collections, accounts payable and payrolls rose by 16.6% to 108 million transactions.

In Private Banking, Unibanco grew by 29% in 2001, reaching R\$7.2 billion in funds under management, a figure that kept it among the largest Brazilian banks in this segment. Highlights include the inclusion of Family Succession and Protection as added services, the expansion of the Investcenter portfolio, and the consolidation of the partnership with Unibanco Asset Management, creating the Private Personal Fund, whose focus is profitability and adjustment to the customer's level of investment risk.

8. Insurance, Private Pensions and Capitalization

The Insurance, Private Pensions and Capitalization businesses enjoyed R\$ 2.2 billion revenues in 2001, a 23.8% growth over the same period the previous year. The 2001 income of these companies totaled R\$216 million. Technical reserves under management reached R\$2.3 billion at the end of the period, with an 11.5% growth versus the previous year.

Unibanco Seguros and AIG Brazil began operating in the market late in 2001 as a single brand (Unibanco AIG Seguros & Previdência), thereby consolidating a strategic alliance process begun in 1997 between Unibanco and AIG – American International Group, the world's largest insurance group in terms of market value, with operations in 130 countries. Gradually, AIG Brasil and Unibanco Seguros integrated their operating and strategic areas. AIG Brasil continues offering its products to banks that do not carry out insurance business. The joining of the brands, coupled with the incorporation of Trevo Seguradora and Trevo Banorte Seguradora (companies belonging to Banco Bandeirantes) helped the period's strong growth.

Premiums issued by Unibanco's insurance companies rose by 23.1%, totaling R\$1.4 billion, while net income reached R\$162.4 million, posting growth of 11%. The company currently is well known for its innovative products, ranking first in Extended Warranties, D&O (Directors & Officers, or liability insurance for executives) and Fire. It is also the leader in the petrochemical, aeronautical and maritime segments. It is the only company that offers Women's Insurance (*Seguro Mulher*), targeting women only.

The insurance companies' consolidated combined ratio of 99.6% improved 150 b.p. from the previous year, and is below the estimated market average of 103%. On this basis, the company ranks second in the market. Its combined ratio is the result of the successful underwriting, prevention and claims control policies that the company followed during the period.

Insurance market research carried out by USP (the University of São Paulo) in the first half of the year placed UNIBANCO AIG Seguros 2nd in quality of services and market positioning and 1st in institutional image.

Note: 2001 net premiums written for the industry up to Oct/2001.

ANNUAL MANAGEMENT REPORT - 2001

Regarding Private Pension Plans, the results achieved by Prever Invest - which only targets individuals, the company's organic growth and the incorporation of the Bandeirantes Group portfolio were instrumental in attaining growth in 2001. Sales reached R\$523.2 million, with a growth of 42% over 2000, greater than the market growth estimated at 38.4%. Net income rose by 27.8%, totaling R\$23.3 million, and technical reserves of R\$1.5 billion in 2001 were 24.3% greater than those of the previous year. The company reached the end of 2001 with 477,000 individual customers and 785 corporate customers, consolidating its leadership in the Large Corporate market.

In the Capitalization segment, the family of products grew in 2001, with the introduction of e-Plin, a fully on-line capitalization security, through which customers take part in draws through the Internet. In December, the company and the Bandeirantes Radio and TV System introduced Unibanco Nota 10, a capitalization security that can be purchased through a single payment and that is sold in lottery shops and other alternative outlets. Furthermore, the characteristics of the Mega Plin were changed. Its profitability rose to 8% or R\$17 million, over 2000. Unibanco Capitalização posted sales of R\$248 million in 2001 and net income of R\$53.7 million.

9. Unibanco Asset Management

Unibanco Asset Management - UAM, which manages third party funds, closed 2001 with a total volume of assets under management of R\$20 billion, including R\$5.0 billion in private pension funds, a segment in which the company ranks second in the market, according to ANBID.

At the end of the year, UAM took over the back-office operations of a major financial institution. This was UAM's first large-scale operation of this type, and significantly strengthened the company's institutional custodian business. The volume involved in the agreement, R\$15 billion, will provide the immediate benefit of a gain in scale with a consequent reduction of unit costs. As this type of service will be a market trend, UAM is strategically positioned capable of fulfilling the needs of its partners in the financial market. Furthermore, during the course of 2001, new funds were introduced geared to client profile in terms of profitability and in operating terms, such as the Unibanco FIA Private Dividends fund, the first equity fund that distributes dividends directly to fund holders.

During the year, a new distribution channel was created (Alternative Channels), targeting a sophisticated market, namely, other financial institutions and consultants. These are portfolio or asset managers interested in offering the market's most profitable funds to their customers, namely individuals with a private banking profile. Although this area is still small, the volume of funds it manages doubled in four months of operation.

Standard & Poor's rated UAM as AMP-1 (the highest rating in the scale) in Asset Management Practices, representing very strong practices in managing third party funds

10. Unibanco Personnel

In 2001, the combination of hiring, developing and retaining talent continued to be the backbone of Unibanco's human resources objectives. Aggressive customer base growth, technological progress in all areas and a wide variety of functions further increased the qualification requirements for Unibanco staff. At the end of the period, the group had 29,704 employees.

On the hiring front, 3705 new employees joined Unibanco from Banco Bandeirantes. 3452 people were also hired from the market, largely to meet the needs of the organic growth program and of Fininvest. Initiatives to find and prepare young talent were ongoing, such as the Internship Program, which employed 227 people in 2001; the Bank of the Future, a partnership with the Development Foundation of the University of Campinas (*Funcamp – Fundação de Desenvolvimento da Unicamp*), which focuses on identifying talent to create solutions in the fields of Information Technology and Statistics and Modeling; the redesign of the Institutional Trainee Program, with a view to preparing and developing specific competencies among recent graduates to enable them to become executives within 5 years; and the structuring of a policy for the hiring of physically-challenged individuals, the selection of which follows the same rigorous standards as any other hiring.

Regarding development, the "360° Evaluation" program has become a basic tool to establish a degree of Managerial Excellence, Shared Excellence and Individual Performance. It also provides input, through its results, for the Strategic Planning of People, whose objective is to identify the level of potential relative to performance of our staff, in order to identify the main ways that could help their development. Investment in training and development totaled R\$23 million, of which R\$5.0 million was spent on training via multimedia.

In retaining personnel, the scope of managers was expanded and the policy of variable remuneration was maintained, which covers 83% of employees. This is the highest ratio among Brazilian banks. This program is in addition to corporate profit sharing, as per our collective bargaining agreement, which is paid by all banks. The Stock Option Plan became more encompassing in December 2001. In its very first grant, it covered more than 200 people, including more than 40 managers from the branch network.

An initiative that had major impact in 2000, the Walther Moreira Salles Prize, became in 2001 the Group's greatest form of recognition, awarding and encouraging exceptional projects and ideas. In its second year, there were 160 cases competing across five categories and 23 finalists. In addition to the five winners, two cases were recognized in special categories. Each one of the seven cases received a lot of 200,000 bank shares.

The introduction of the Corporate Portal, an Intranet communication vehicle, enables fast and easy access to information on business, strategy and the competition, which is indispensable to day-to-day work at Unibanco. The Portal also contributed to the rationalization of processes by reducing the time required to execute certain tasks and cutting costs. Introduced in March 2001, it is estimated that the Portal will be available at the workstations of almost 25,000 employees as early as the first half of 2002.

The Employee Satisfaction Survey, carried out since 1997, reached an 85% ratio in 2001, in line with international benchmarks. This ratio has advanced 23% since it was first measured, meeting its ambitious objectives.

Unibanco Employee Satisfaction Tracking**11. Corporate Risk Management**

Unibanco was the pioneering corporation in the Brazilian financial market in terms of instituting Global Risk Management: a director's office with a corporate view to manage its risks. This office is responsible for the management of market, credit and operating risks throughout the Group's operations. Furthermore, each business unit has its own dedicated risk management team. The Risk Committee, comprised of Unibanco senior executives, evaluates the risks involved in the activities and proposes risk management policies for the bank.

Market risks are assessed daily by collecting and mapping the positions of financial instruments (Commercial Bank and Trading portfolios) and by surveying market risk factors such as interest rates, foreign exchange rates and the price of stocks and commodities, all of which are then processed according to the Value-at-Risk method. This provides a measurement of risk synthesis by determining the correlation and volatility of the factors and the present value of the positions. It also allows other measures to be taken, such as sensitivity.

Concerning Credit Risk Management, Unibanco develops portfolio management instruments capable of consolidating credit risks, capital requirements and the establishment of prudent limits which provide managers with greater assurance. Additionally, methodologies were included for the analysis of the rating models of the Wholesale Bank and of the credit scoring of the Retail Bank, checking adherence and simulating stress scenarios.

In line with the credit risk management principles presented by the Committee to the Basel Banking Supervision, the Global Risk Management area is working on improving internal classification models, taking into account the need to differentiate credit risks, the integrity of the internal rating structure and data collection and systems' management, as well as risk components (probability and loss through default, and its exposure), which adds real value, weighted by the risk, to the portfolio.

Meeting the international market's best practices requirements as well as domestic regulations of the Brazilian financial market, Unibanco implemented an Internal Controls System that is accessible by all the areas of the Group and has been available, since 2000, on the Intranet. This system provides a periodic staff from the risk area, identify their exposures and assess the effectiveness of the existing controls in their units. This structure is the basis for the identification of indicators and the implementation of a database for the quantification of exposure to operating risk while enabling the rational allocation of capital.

12. Technology and the Internet

Key technological achievements in previous years allowed the Banco Bandeirantes integration to occur smoothly and rapidly. This operation was carried out in only seven months, unique considering the its size and the positive effects on new customers and employees.

UNIBANCO - UNIÃO DE BANCOS BRASILEIROS S.A. AND UNIBANCO - UNIÃO DE BANCOS BRASILEIROS S.A. AND SUBSIDIARY COMPANIES

ANNUAL MANAGEMENT REPORT - 2001

Servicing channels were only minimally affected, as fewer than 650 service incidences were recorded across all Banco Bandeirantes' points of sale, and less than 20% of these had a noticeable impact on customers.

Overall, there are more than 6600 ATM machines in operation in the branch network, while the 30 Hours Telephone service, which processes over 6.0 million transactions per month, provides 83% automated customer service. This technological progress allowed the 30-Hour Telephone service to provide support for customer relationship programs.

In 2001, increased focus had to be placed on new technological solutions. The branch security program, which includes the installation of Teller Assist equipment, was extended to the entire network. This equipment eliminates the need to handle money and yields savings of R\$30 million per year in transportation expenses. The transfer of the Fininvest Data Processing Center from Rio de Janeiro to Unibanco's São Paulo headquarters was completed. Teams were trained and new systems for the implementation of the Brazilian Payment System (*SPB - Sistema de Pagamentos Brasileiro*) were developed. Additionally, a new anti-fraud system for ATM machines, implementing an additional password, was put in place, a major challenge for the financial system.

The new Unibanco.com portal began operating in the period, as did the new 30-Hour Online service. With an innovative format and a more objective and didactic browsing system, the portal and Internet Banking performed well during the year, generating a substantial expansion of the online customer base to 615,000 at the end of 2001, representing growth of 121% for the year. The redesign of Unibanco.com and the 30-Hour Online service allowed the introduction of products and services specifically developed for the electronic banking.

The objective of the Broker's Portal, introduced in 2000, was fully met. It offers operating, commercial and management support to the 12,000 insurance brokers who have a relationship with Unibanco AIG Seguros. The Portal's purpose is to provide greater speed and quality of servicing. In December 2000, the Portal received 2,369 visits, climbing to 19,435 by December 2001. The ratio of transactions carried out versus visits to the site rose from 23% in 2000 to 54% in 2001.

13. Corporate Governance

In 2001, Unibanco's set of Corporate Governance practices was recognized. In June, Unibanco and Unibanco Holdings were part of the first group of companies to join BOVESPA's Level 1 of Corporate Governance. This illustrates the companies' commitment to high standards of governance and to the release of information in a transparent, concise and timely manner.

Unibanco was the first Brazilian company to receive a Corporate Governance rating granted by an independent risk-rating agency (SR Rating), scoring 8.4 on a 1 to 10 scale. This is the first rating of its kind in the country and only five agencies in the world provide this service, which once again confirms Unibanco's pioneering spirit in adopting and fostering good corporate governance practices.

Unibanco was also chosen to be part of the Dow Jones Sustainability Group Index (DJSI), in its latest annual revision, as of October. The DJSI is benchmark for an increasingly broad group of investors and funds with a Socially Responsible Investing (SRI) profile, or, investors concerned with social responsibility in the operation of the companies in which they are shareholders. Only four Brazilian companies are part of this edition of the index.

In 2001, Unibanco was the sole Latin American bank nominated by Investor Relations Magazine as the "Best Latin American Company Regarding Investor Relations in the US Market" Award.

For the past two years, MZ Consult has given the Investor Relations site the Top 5 Award for Investor Relations websites. Last year's award, sponsored jointly with Latin Finance magazine, involved 280 companies throughout Latin America, while the bank's website also placed second for all of whole Latin America.

14. Community-oriented Activities

All of Unibanco's activities geared toward adding value for shareholders were carried based on the most advanced methods of social responsibility, with efforts concentrated in the fields of culture, education, healthcare, the environment and volunteer work. Recognition of this work is reflected in some of the awards received in 2001, such as the Social Top of the Brazilian Sales and Marketing Executives Association (ADVB – *Associação dos Dirigentes de Vendas e Marketing do Brasil*), for the Day-Care Center (*Creche Raízes*) project and for the 10th anniversary of Unibanco Environment (*Unibanco Ecologia*). The same entity also bestowed the Citizen Company (*Empresa Cidadã*) award upon Unibanco, for investments in the community and in environmental education.

The Moreira Salles Institute (*IMS – Instituto Moreira Salles*), established in 1990 and Unibanco's non-profit organization arm in charge of developing cultural programs, conceives, implements and presents projects in its cultural centers in Rio de Janeiro, São Paulo, Belo Horizonte and Poços de Caldas. In 2001, the 13 exhibitions held at the centers were visited, free of charge, by more than 31,000 people. Overall, the institute's activities drew more than 100,000 visitors. Additionally, the Moreira Salles Institute coordinates the activities of the Unibanco Cinema Space (*Espaço Unibanco de Cinema*), the largest private chain dedicated to cinematic art and culture in the country, with an emphasis on local production. In 2001, the 34 exhibition rooms of the Space were visited by a total of 1.3 million viewers. Parallel events were visited by more than 300,000 people.

Education highlights included three initiatives: the contribution to the federal government's Literacy Solidarity (*Alfabetização Solidária*) project, benefiting 2500 students in northeastern towns and helping to cut down on illiteracy in the country; the Banco Fininvest *Inform* (Informatizar) project in Rio de Janeiro, which provides information technology lessons taught in schoolroom-buses; and the contribution to the Junior Achievement Association, in which volunteer Unibanco staff provided lessons to 130 youths on the subject of the business world. This Association, established in the United States in 1919, is active in more than 100 countries, and has helped more than 40,000 students.

In the healthcare field, the initiative comes from Unibanco AIG Seguros and Private Pension Plans, with part of the premiums paid by the "Women's Insurance" (*Seguro Mulher*) product being donated to the Brazilian Cancer Control Institute (*IBCC – Instituto Brasileiro de Controle do Câncer*).

One of the best known programs geared toward the community, Unibanco Environment (*Unibanco Ecologia*), has made 240 programs viable over the course of its 10-year existence, benefiting roughly 130 communities. During this time, it received 29 awards including the Golden Award of the International Public Relations Association and a Special Mention at the United Nations.

**UNIBANCO - UNIÃO DE BANCOS BRASILEIROS S.A. AND

A major volunteer campaign, SuperAction Solidarity (*SuperAção Solidária*) was also carried out, this being the result of employee initiative and staff involvement from several areas. Through social activities resulting in effective aid to entities, it involved 4000 staff members in addition to family and friends, from July to September. These activities benefited 87 welfare entities from several states. Unibanco also helped with financial resources and institutional support, which complemented employee donations, in cash and in kind.

Closing Comments

Committed to pursuing the continued and balanced growth of the organization, with a view to providing greater value for our shareholders, we thank our customers, for whom we have tried to repay their trust and loyalty with constantly improving and unique standards of service; our employees and associates, who contributed so much toward the bank's growth and, finally, our shareholders, for their support and trust in our management. We maintain our strong belief in Brazil's development, for which our future activities are designed.

**UNIBANCO - UNIÃO DE BANCOS BRASILEIROS S.A. AND
UNIBANCO - UNIÃO DE BANCOS BRASILEIROS S.A. AND SUBSIDIARY COMPANIES****NOTES TO THE FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2001 AND 2000**(Amounts expressed in thousands of Brazilian reais unless otherwise indicated)

1. Operations

The consolidated operations of Unibanco - União de Bancos Brasileiros S.A. and its direct and indirect subsidiaries and jointly controlled companies in Brazil and abroad include, besides the financial activities of the Unibanco Conglomerate, other activities carried out by subsidiaries with specific objectives, principally, related to insurance, credit card operations, capitalization plans, private retirement plans, and asset management.

During 2000 the Unibanco Conglomerate expanded its financial, insurance and credit card activities through the following acquisitions:

- 100% of Banco Credibanco S.A. (Credibanco) and its subsidiary companies in April;
- 100% of Banco Bandeirantes S.A. (Bandeirantes) and its subsidiary companies in December; and
- the remaining 50% of Banco Fininvest S.A. (Fininvest) and its subsidiary companies in December.

The consolidated financial statements for 2001, as mentioned in Note 3, comprise those of acquired companies operations, and for 2000 comprise the operations of acquired companies proportionally.

In 2001, the Unibanco Conglomerate increased its consumer credit operations, through the following strategic associations:

- with Magazine Luiza S.A. (Magazine Luiza), a traditional department store chain, through a creation of a new credit, financing and investment company with 50% participation of Fininvest, in September; and
- with Globex Utilidades S.A. (Globex), controlling company of Ponto Frio retail chain, acquiring 50% of Banco Investcred S.A. (Investcred) and its subsidiary companies in October.

The consolidated financial statements mentioned in Note 3 comprise the operations of acquired companies since the acquisition date.

2. Presentation of Financial Statements

The financial statements of Unibanco - União de Bancos Brasileiros S.A. and its foreign branches (Unibanco) are presented together with the consolidated financial statements of Unibanco and its subsidiaries (Unibanco Consolidated), and have been prepared in accordance with accounting principles established by Brazilian Corporate Law and the Brazilian Central Bank.

3. Consolidated Financial Statements

The consolidated financial statements have been prepared in accordance with consolidation principles determined by the Brazilian Securities and Exchange Commission (CVM). Intercompany investments, balances, income and expenses, as well as unrealized results, were eliminated upon consolidation.

The consolidated financial statements comprise the accounts of Unibanco - União de Bancos Brasileiros S.A. and its foreign branches, its direct and indirect subsidiaries and its jointly controlled companies, as shown in Note 10.

The financial statements of the subsidiaries Unibanco Leasing S.A. - *Arrendamento Mercantil* and Dibens Leasing S.A. - *Arrendamento Mercantil* were reclassified by means of out-of-book adjustments, in order to reflect their financial position and results of operations in the consolidation in accordance with the financial method of accounting for leasing transactions.

In conformity with CVM Instruction 247/96, assets, liabilities, revenues and expenses of jointly controlled companies have been included in the consolidated financial statements on a proportional basis.

4. Summary of Significant Accounting Policies

The accounting policies adopted by Unibanco and its subsidiary companies are in accordance with the requirements of Brazilian Corporate Law and the regulations of the Brazilian Central Bank, the Brazilian Securities Commission and the Superintendency of Private Insurances.

(a) Determination of net income

Net income is determined on the accrual basis and considers:

- income, expenses and monetary or exchange rate variations, at official rates or indices, pro rata temporis, on current and long-term assets and liabilities;
- the effects of the provisions to adjust the assets to market or realizable values;

- the provision for the PIS (Employee's Profit Participation Program) at a rate of 0.65% and COFINS (Tax for Social Security Financing) at a rate of 3%;
- the adjustments to the insurance, capitalization and retirement plans technical reserves;
- the effects of the adjustment of investments in subsidiary and associated companies to reflect the equity method of accounting;
- the provision for federal income tax at the rate of 15% on taxable income, plus a specific surcharge of 10% on taxable income over established fiscal limits;
- the provision for social contribution calculated at the rate of 12% in January 2000 and 9% from February 2000 on the adjusted income before income tax;

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2001 AND 2000

(Amounts expressed in thousands of Brazilian reais unless otherwise indicated)

- tax credits calculated on temporary differences between book value and tax amounts and on tax losses; and
- profit sharing.

(b) Current and long-term assets

These assets are stated at cost plus, when applicable, the related income and monetary and exchange rate variations, and decreased by the related unearned income and/or allowances for losses. The allowance for lending, leasing and other credit losses is set up in an amount considered sufficient by management to cover possible future losses. Management's analysis to establish the provision required takes into account the economic environment, past experience and specific and general portfolio risks, as well as the regulations of the Brazilian Central Bank.

(c) Permanent assets

Investments, fixed assets and deferred charges are stated at cost plus restatement through December 31, 1995.

Investments in subsidiary and associated companies are accounted for using the equity method of accounting, as shown in Note 10. Other investments consist principally of

investments carried at cost and membership certificates of stock and commodities exchange adjusted to book equity values.

Goodwill relating to the acquisition of subsidiaries is being amortized up to 10 years, according to the expected period of benefit.

Depreciation of fixed assets is calculated on the straight-line method at the following annual rates: buildings in use - 4%; equipment in use - 10%; communications, data processing, and transportation systems - 20%.

Deferred charges, composed substantially of leasehold improvements and software acquisition and development, are amortized over the term of the respective lease contracts or up to five years.

(d) Current and long-term liabilities

These amounts include, when applicable, accrued interest and monetary and exchange rate variations.

(e) Deferred income

Deferred income includes prepaid non-returnable revenues.

The allowance for lending, leasing and other credit losses is recorded in accordance with Resolution 2682 of the Brazilian National Monetary Council. The minimum allowance for each level is utilized as a general rule, however, based on the judgment and experience of management, higher percentages are used within each level in order to more accurately assess the risk of certain clients operations or portfolios.

(f) The operations renegotiated in the period with clients as established in Resolution 2682 of the Brazilian National Monetary Council totaled R\$733,012 (2000 - R\$342,239) in Unibanco and R\$1,053,787 (2000 - R\$647,449) in Unibanco Consolidated. These operations were recorded in order to keep the risk level assess existing before the renegotiation.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2001 AND 2000

(Amounts expressed in thousands of Brazilian reais unless otherwise indicated)

As a result of the corporate reorganization of the Unibanco Group's companies abroad, mentioned in Note 10g, the Unibanco's Board of Directors approved in a meeting held on October 31, 2001 the distribution of a portion of the retained earnings of the Grand Cayman branch through 1995 in the amount of US\$7,469 thousand and, in the

meeting held on December 26, 2001, the distribution of the retained earnings for 1998, 1999 and part of the retained earnings for 2000 of the Grand Cayman branch in the amount of US\$50,516 thousand, paying through the exchange of shares owned in the foreign companies.

10. Investments in Subsidiary and Associated Companies

Results of investments in subsidiary and associated companies were recorded as "Equity in results of subsidiary and associated companies" in the statement of income in the group "Other operating income (expenses)" and amounted to R\$1,114,680 (2000 - R\$774,481) in Unibanco and R\$7,575 (2000 - R\$3,696) in Unibanco Consolidated. The foreign branches and subsidiary companies exchange gains in the amount of R\$161,676 (2000 - R\$123,514) in Unibanco and R\$281,908 (2000 - R\$141,209) in Unibanco Consolidated were recognized as "Other operating income". As a result of the high foreign exchange volatility in 2001, Unibanco partially hedged its foreign investments in U.S. dollars in the amount of US\$430 million. The expense of R\$77,954 in Unibanco and Unibanco Consolidated was also recorded in "Other operating income", reducing the exchange gain on foreign investments. The investments in subsidiary and associated companies are detailed in the Appendix to this Note and the following events relate to investments in subsidiary and associated companies in the years ended December 31, 2000 and 2001:

(a) In April 2000, Unibanco concluded the purchase of 100% of the capital of Credibanco and its subsidiaries for R\$108,067, plus R\$62,803 for goodwill, which is being amortized up to five years, using the straight-line method in accordance with the expected period of benefit. During 2001, R\$12,561 (2000 - R\$7,327) was amortized and recorded as "Other operating expenses".

As part of the reorganization process, Unibanco and Credibanco signed an "Agreement of Assignment of Rights and Assumption of Obligations", by which Credibanco transferred to Unibanco R\$495,268 in assets and R\$647,099 in liabilities at face value and the difference was received in cash. Through this agreement, the derivative instrument contracts, guarantees provided to third parties, securities in custody and assets under management were also assigned to Unibanco.

In April 2001, Credibanco merged Cartão Unibanco Ltda.

(b) In September 2000 the joint venture between Unibanco and PT Multimedia.com, controlled by Portugal Telecom (PT) was approved. Through this association, Bancol.net S.A. (Bancol), controlled by Régula Participações S.A. (Régula) was created. In April 2001, Unibanco received from Régula 23,071,433 common shares issued by Bancol with capital reduction of R\$39,679. After this Unibanco

sold 1,295,959 shares to third parties, with a gain of R\$7,178, recorded as "Non-operating income" and Régula merged into Unibanco Representação e Participações Ltda..

(c) In December 2000, the Brazilian government authorities approved the association between Unibanco, Unibanco Holdings, Caixa Geral de Depósitos (CGD) and Bandeirantes. Through this association, Unibanco acquired a 100% stake in Caixa Brasil Participações S.A. (CBP), the controlling company of Bandeirantes, and CGD received directly and indirectly 12.25% of interest in Unibanco. The transaction generated a goodwill of R\$973,226 in Unibanco and R\$999,653 in Unibanco Consolidated, which is subject to adjustment based on the agreement between the parties (mainly guarantee of the loan portfolio). The goodwill is being amortized up to 10 years, in accordance with the expected period of benefit, based on an appraisal report issued in the acquisition date. During 2001, R\$55,033 was amortized in Unibanco and R\$61,697 in Unibanco Consolidated, recorded as "Other operating expenses".

In 2000 and 2001, there was corporate reorganization processes which involved Bandeirantes Group, with the sale of interest in Bandeirantes S.A. Capitalização, in Trevo Seguradora S.A., in Trevo Banorte Seguradora S.A., in Bandeirantes Administradora de Cartões de Crédito e Assessoria Ltda. and the minority interest in Sersa - Centralização de Serviços dos Bancos S.A. to Unibanco's companies which have the same activity. This reorganization generated a gain of R\$284,567, which was recognized entirely in the seller companies and as a goodwill in the buyer companies and was considered as unrealized gains in Unibanco, when applicable. It is expected the recognition of gain in Unibanco will be made in line with amortization of goodwill.

During 2001, Bandeirantes S.A. Capitalização was merged into Unibanco Companhia de Capitalização and Trevo Seguradora S.A. and Trevo Banorte Seguradora S.A. were merged into Unibanco AIG Seguros S.A.. Unibanco Leasing S.A. - Arrendamento Mercantil was merged into Bandeirantes S.A. - Arrendamento Mercantil, which changed its name to Unibanco Leasing S.A. - Arrendamento Mercantil.

As part of the reorganization process, Unibanco and Bandeirantes signed an "Agreement of Assignment of Rights and Obligations and Other Understanding", by

which Bandeirantes transferred to Unibanco assets and liabilities at their face value in accordance with the "Schedule of Migration" of branches, and the difference was received in cash. Up to December 31, 2001, R\$1,598,414 of assets and R\$2,103,367 of liabilities were transferred to Unibanco. Through the "Schedule of Migration" the derivative instrument contracts, guarantees provided to third parties and the securities in custody have also been assigned to Unibanco.

(d) In December 2000, Unibanco acquired from Group Icatú the remaining 49.9% of interest in Fininvest and its subsidiaries for R\$483,107. As a result, Unibanco now owns 99.759% of Fininvest. The operation generated a goodwill of R\$401,196 in Unibanco, which is being amortized up to 10 years, in accordance with the expected period of benefit, based on an appraisal report issued on the acquisition date. During 2001, R\$17,872 was amortized and recorded as "Other operating expenses".

(e) In September 2001, Fininvest and Magazine Luiza, a traditional department store chain, established an association through the creation of a new company of credit, financing and investment, through 50% of participation for Fininvest and 50% for Magazine Luiza. The amount of investment in Fininvest was R\$42,530. The operation generated a goodwill of R\$31,842, will be amortized as from 2002, up to 10 years, in accordance with the expected period of benefit.

(f) In October 2001, Unibanco signed an Association Agreement with Globex, controlling company of Ponto Frio retail chain, whereby, Unibanco acquired 50% of interest in Investcred for R\$110,805. The operation generated a goodwill of R\$58,873, which is being amortized up to 10 years, in accordance with the expected period of benefit. During 2001 R\$981 was amortized and recorded as "Other operating expenses".

(g) In December 2001 there was a corporate reorganization of the foreign investments, in which Unibanco had a direct and an indirect participation. Unipart Participações Internacionais Ltd. (Unipart Internacional) was created and capitalized at the book value of investments transferred by the former controlling company. The principal companies transferred to Unipart Internacional were:

- 100% of Unibanco Cayman Bank Ltd., subsidiary of Unibanco Participações Internacionais Ltda. (current name of Tahoma Participações Ltda.);
- 75.5% of Unicorp Bank & Trust Ltd.; 99.999% of Unibanco União de Bancos Brasileiros (Luxembourg) S.A. and Interbanco S.A. and 100% of UBB Holding Company, Inc., controlling company of Unibanco Securities Inc., subsidiary companies of Unibanco; and
- 100% of Banco Bandeirantes Grand Cayman Inc., subsidiary company of Bandeirantes.

11. Resources from Securities Issued

Resources from securities issued are represented by mortgage notes and debentures issued in Brazil and euronotes and commercial papers issued abroad.

(a) Mortgage notes are restated using the savings deposits index, plus average interest of 10.20% per annum, and are payable up to September 12, 2003.

14. Fiscal, Employee and Civil Litigations

Unibanco and its subsidiaries are defendants in several legal actions, relating principally to income taxes, indirect taxes and labor claims. Based on the advice of our external counsel, Unibanco recorded provisions to offset possible

future losses, based on the success probability of the suits. Provisions recorded and the changes in the provision in 2000 and 2001 were as follows:

	Unibanco		Unibanco Consolidated	
	2001	2000	2001	2000

(a) Tax litigation

Unibanco and its subsidiaries are involved in several tax suit, including those relating to the constitutionality of certain taxes and the potential liability is fully provided.

(b) Employee litigation

Labor unions and former employees filed several lawsuits against Unibanco and its subsidiaries to seek compensation for labor rights. Unibanco cannot assure that it will win these lawsuits and, based of this, the contingency amount is recorded as provision, based on the average of payments made.

(c) Civil litigation

Unibanco and its subsidiaries filed other actions and claims on a variety of matters, including, previous economic plans. The civil litigations provisions are recorded in accordance with the probability of success in each type of claim.

(d) Bandeirantes related claims

Shareholders' claims. Certain former minority shareholders of Bandeirantes have initiated lawsuits against Bandeirantes, Caixa Geral de Depósitos, former controlling

shareholders of Bandeirantes and/or against Unibanco. Certain former shareholders of Banorte (a bank acquired by Bandeirantes before Unibanco became the controlling shareholder of Bandeirantes) have also filed lawsuits against Bandeirantes and the Central Bank of Brazil, seeking to terminate the Central Bank intervention in Banorte before its acquisition by Bandeirantes. In accordance with the Agreement between Unibanco and Caixa Geral de Depósitos for the acquisition of a controlling interest in Bandeirantes, Caixa Geral de Depósitos assumed full responsibility for such lawsuits. Therefore it is not necessary to record provisions for this purpose.

Tax and general litigation. There are also several lawsuits in which Bandeirantes is a party in the normal course of business. Management believes that an unfavorable outcome in any or all of the lawsuits will not have a material adverse effect on the business of Bandeirantes, since the amounts are fully recorded, being included in the Unibanco Consolidated balances.

Preferred shares carry no voting rights but have priority over common stocks in the reimbursement of capital in the case of liquidation, up to the amount of capital represented by such preferred shares, and are entitled to receive a 10% greater dividend per share than that distributed to common stockholders.

Each Share Deposit Certificate (*Unit*) is represented by a preferred share issued by Unibanco and by a Class B preferred share issued by Holdings and is traded in the Brazilian market.

Each *Global Depositary Share* (GDS) is represented by 500 *Units*, and is traded in the international market.

On December 11, 2000 as a result of the association with CGD and Bandeirantes (Note 10c), an agreement for exchange of shares was made related to:

- (i) shares of CBP, controlling company of Bandeirantes; and
- (ii) shares of minority shareholders of Bandeirantes.

The shares exchange was approved in the following Extraordinary Shareholders' Meetings of Unibanco:

(i) CBP – on December 27, 2000, when the capital of Unibanco was increased by R\$1,043,771, through the issue of 17,229,843,587 shares without par value, being 10,471,843,587 common shares and 6,758,000,000 preferred shares; and

(ii) minority shareholders of Bandeirantes – on December 28, 2000, when the capital of Unibanco was increased by R\$18,403, through the issue of 303,762,675 shares without par value, being 184,618,926 common shares and 119,143,749 preferred shares.

On October 31, 2001 the Extraordinary Shareholders Meeting approved the "Spin-off and Up stream Merger Enrollment of Notice of Purposes", signed on October 15, 2001 between Holdings, Unibanco and Banco Bandeirantes

de Investimentos S.A. (BBI) and related "Amendment to the Enrollment", whereby the spin-off of BBI was decided with incorporation of the equity of BBI part by Unibanco and part by Holdings, with the consequent extinguishment of BBI. The equity incorporated by Unibanco, resulted in a capital increase of R\$2,321, represented by 232,663,384 new preferred shares without par value. The meeting also approved a capital increase of R\$302,007 using revenue reserves, without change in the number of shares. Both capital increases are subject to the approval of the Brazilian Central Bank.

(b) Dividends and interest on own capital

All stockholders are entitled to receive, in total, a mandatory dividend of at least 35% of the Bank's annual net income as stated in the statutory accounting records, adjusted for transfers to the legal reserve.

On July 23, 2001, the Board of Directors approved the distribution of dividends, as an advance against the mandatory dividend for 2001, in the total amount of R\$152,208, representing R\$1.0368 per 1,000 common shares and R\$1.1405 per 1,000 preferred shares. The payment of the dividends was made as from July 31, 2001.

For each *Unit* there were dividends of R\$2.1831 per 1,000 of *Units* attributed, R\$1.0426 from Holdings and R\$1.1405 from Unibanco.

For each GDS there were dividends of R\$1.09155 attributed.

On January 22, 2002, the Board of Directors approved the distribution of dividends, as an advance against the mandatory dividend for 2001 in the amount of R\$170,985 representing R\$1.1801 per 1,000 common shares and R\$1.2981 per 1,000 preferred shares. The payment of the dividends was made as from January 31, 2002.

For each *Unit* there were dividends of R\$2.4874 per 1,000, of *Units* attributed, R\$1.1893 from Holdings and R\$1.2981 from Unibanco.

(d) Treasury stocks and Buy-back program

(i) Through the "Share Exchange Agreement" signed on August 31, 2001, Unibanco assigned and transferred to Holdings 24,397,249 Class B preferred shares issued by Holdings and acquired through a prior repurchase program in the form of *Units*, and Holdings assigned and transferred to Unibanco the same quantity of preferred shares issued by Unibanco. The shares exchanged were recorded in Unibanco and in Holdings as treasury stocks.

(ii) The Board of Directors of Unibanco and Holdings in the meeting held on September 20, 2001 authorized, for a period of three months, the acquisition at market prices of up to 220,948,544 Unibanco's common shares, 4,597,425,824 Unibanco's preferred shares, and 4,236,225,772 Holding's Class B preferred shares, to be maintained in treasury for subsequent sale or cancellation, without capital reduction. The acquisition can be made through the acquisition of shares, *Units* or GDS.

On December 27, 2001, through the meeting of the Board of Directors, the buy-back program was renewed with the following limits: up to 257,364,326 Unibanco's common shares and up to 3,177,019,267 Unibanco's preferred shares, and up to 3,438,618,826 Holdings' Class B preferred shares.

Up to December 31, 2001, 153,200,000 Unibanco's preferred shares, 46,500,000 *Units*, and 1,702,500 GDS issued by both Unibanco and Holdings were repurchased. Through of "Share Exchange Agreement", Unibanco assigned and transferred to Holdings 897,750,000 Class B preferred shares issued by Holdings, acquired in the form of *Units* and GDS and Holdings assigned and transferred to Unibanco 897,750,000 preferred shares issued by Unibanco. Therefore, Unibanco recorded 1,948,700,000 preferred shares at an average price of R\$37.10 as treasury stocks. The minimum and maximum acquisition prices were R\$34.87 and R\$55.91, respectively.

(iii) The market value of treasury stocks at December 31, 2001, based on *Units* price at December 28, 2001 in the São Paulo Stock Exchange was R\$116,007.

(e) Earnings per share

Earnings per 1,000 shares for the year ended December 31, 2001 are R\$6.95, considering the average outstanding shares in the period, or R\$7.01, considering the outstanding shares as of December 31, 2001.

Earnings per 1,000 shares, presented in the Income Statement for the year ended December 31, 2000 were calculated excluding shares issued on December 27 and 28, 2000.

The amounts above reflect operations between Unibanco and its subsidiary companies, and were eliminated in consolidation. Transactions with unconsolidated related parties are limited to normal banking transactions and are not material in the operational context of Unibanco.

Related-party transactions were made at average market rates, in effect at the respective transaction dates, considering the absence of risk.

Services rendered relate basically to services offered by Unibanco to the group companies according to the terms of the contractual agreements, through utilization of physical assets and personnel related to credit card, leasing, capitalization plans, insurance operations, virtual bank and brokerage.

Other administrative expenses relate mainly to the payment of rents based on the market value of the buildings according to the lease contracts.

19. Financial Instruments

Unibanco enters into transactions in a variety of financial instruments recorded in its own financial statements or off-balance sheet in memorandum accounts, in order to meet its own and its customers' needs to reduce exposure to market, currency and interest rate risks.

The risks involved in these operations are managed through operational policies, determination of limits by the Bank's Financial Committee and by closely monitoring positions.

(a) Financial instruments recorded in the financial statements compared to market values at December 31, 2001 are as follows:

	Unibanco		Unibanco Consolidated	
	Book value	Market value	Book value	Market value

Interest rate and currency term and futures contracts represent future commitments to purchase or sell financial instruments at specific terms and at specified dates. The notional amounts represent the face value of the corresponding instrument at the date of the operations' liquidation. The credit risks associated with the future and term contracts are minimized due to daily cash settlements and margin account deposits. Future and term contracts are subject to the risk of movements in interest rates or the value of the underlying instruments.

Swap contracts represent future commitments to exchange currencies or indices for a contractual period and terms. The notional amount represents the basis on which the cash flows are determined. The risks associated with swaps relate to the potential inability or unwillingness of the counterparts to the contractual conditions and the risk associated with changes in market conditions due to movements in interest rates and the exchange rate of currencies.

Options are contracts which: (i) transfer, modify, or reduce interest rate risk, or (ii) allow the Bank to purchase or sell financial instruments in exchange for the payment or receipt of a premium at inception of the contract. As a purchaser of options, Unibanco pays a premium and, as a writer of options, receives a premium in exchange for bearing the risk of movements in future interest rates on market prices for the underlying financial instruments. The credit and market risks are limited to the extent of premiums paid on purchased options and the risk associated with the movements in market conditions could influence written options.

22. Employees Benefits

Resolution 371/2000, issued by the Brazilian Securities and Exchange Commission (CVM), approved a new regulation prepared jointly by the IBRACON - Brazilian Institute of Independent Auditors and the CVM, which must be followed by public companies in recording employee benefits. The adoption of the new regulation, did not produce impacts on Unibanco's and on Unibanco Consolidated financial position. The main benefits given by Unibanco to its employees are:

(a) Free Benefits Generation Program

Unibanco and part of its employees sponsor a "Free Benefits Generation Program" (PGBL), a system whereby the participant accumulates financial resources during their career, through contributions paid by the employee and the Company where he works. These contributions are invested in an Exclusive Financial Investment Fund (FIFE). The program is based on defined contribution.

The program is managed by Unibanco Previdência S.A. and Unibanco Asset Management - Banco de Investimento S.A. is responsible for the financial management of the FIFE funds.

The contributions made by employees vary according to their ages between 1% to 9% and the contributions made by Unibanco vary according to the return on equity in the prior year between 50% and 200% of the participant's contribution, directly related to the return on equity.

As a result of Banco Bandeirantes' acquisition, Unibanco and a portion of its employees also sponsor a defined contribution pension plan administered by Trevo - Instituto Bandeirantes de Seguridade Social, a private pension entity, for the primary purpose of supplementing the retirement benefits provided by the government retirement plans.

In 2001, the contribution was R\$277 (2000 - R\$2,247) in Unibanco and R\$2,521 (2000 - R\$2,679) in Unibanco Consolidated.

(b) Stock option program

The Extraordinary Shareholders' Meeting held on October 31, 2001 approved the stock option program, denominated *Performance*. The objective of *Performance* is to foster the executives' long-term commitment to the highest performance standards, as well as attract, retain and motivate new talents. Pursuant to the *Performance* program, the executives of Unibanco can be granted stock or unit options that can be exercised between 2 to 5 years. The option rights are limited to 1% of the authorized capital per year and the amount granted is limited to 10% of the authorized capital, as a whole.

Up to December 2001, there was no stock option to be exercised.

(f) Unibanco and its subsidiaries insure their properties and equipment to the extent considered necessary to cover possible losses, taking into account the nature of the activity. At December 31, 2001, the insurance coverage on properties and other assets in use totaled R\$509,499 (2000 - R\$371,029) in Unibanco and R\$1,056,804 (2000 - R\$841,366) in Unibanco Consolidated.

(g) Assets leased from third parties are being amortized through 2004. Expenses incurred on leasing operations totaled R\$52,660 (2000 - R\$39,868) in Unibanco and R\$52,804 (2000 - R\$43,933) in Unibanco Consolidated. If the leasing agreements were recorded as financing purchase, the leased assets at original cost, restated and depreciated would be R\$40,235 (2000 - R\$22,720) in Unibanco and R\$41,307 (2000 - R\$23,829) in Unibanco Consolidated and the debt recorded as liabilities would be R\$42,129 (2000 - R\$48,283) in Unibanco and R\$42,379 (2000 - R\$49,016) in Unibanco Consolidated.

24. Change in Classification and Valuation of Marketable Securities and Derivative Financial Instruments

The Brazilian Central Bank established new rules to record and valuation of marketable securities and derivative financial instruments, effective June 30, 2002.

(i) Marketable securities

According to the Brazilian Central Bank Circular 3068 issued on November 8, 2001, the securities must be classified as follows: a) trading securities; b) securities available for sale; and c) securities held to maturity.

Securities classified as trading and available for sale must be carried at fair value and the unrealized gain or loss must be recognized as revenue or expense for the period, if related to trading securities or as a specific component of stockholders' equity, net of applicable taxes, if related to securities available for sale. Securities held to maturity must be recorded at acquisition cost, plus accrued interest, which will be recorded in revenue for the period.

(ii) Derivative financial instruments

According to the Brazilian Central Bank Circular 3082 issued on January 30, 2002, the derivative financial instruments must be recorded at fair value and the unrealized gain or loss must be recognized as revenue or expense for the period, although a specific practice must be observed for derivative instruments used for hedging.

The derivative financial instruments must be classified as: a) market risk hedge, and b) cash flow hedge. The derivative financial instruments designated as hedge, and the respective item subject to the hedge, must be adjusted at their fair value and the unrealized gain or loss must be recorded as revenue or expense for the period, if designated as market risk hedge, and in a specific component of stockholders' equity, net of applicable taxes, if designated as cash flow hedge.

The management is presently assessing the impact of the application of these new criteria on financial position of Unibanco.
